Aztec Group appoints Sangjune Park as Chief Architect and Data Director

Aztec Group, a premium provider of private market services, has strengthened its technology leadership team with the appointment of Sangjune Park as Chief Architect and Data Director, supporting its continued investment in technology, data and innovation to enhance the client experience and support its long-term growth strategy.

Sangjune will lead Aztec's data strategy and capabilities, helping to strengthen how the business uses data to enhance decision-making, improve operational efficiency and deliver greater value for clients. His appointment supports Aztec's broader technology strategy, which focuses on combining market-leading technology and purposeful automation with specialist expertise to deliver a premium client experience. By continuing to invest in data capabilities, Aztec aims to provide clients with a more connected and scalable service model while maintaining its high touch service.

"As the alternatives market becomes more complex and data-driven, the ability to harness data effectively is central to how we deliver value for our clients," said Jason Adams, Chief Technology Officer at Aztec Group. "Sangjune brings deep expertise across data, architecture and technology strategy, and his appointment reflects our continued investment in our data capabilities to provide clients with access to trusted information, helping them to unlock insights and make better decisions."

Sangjune brings extensive experience as a technology and data leader, having delivered large-scale technology change programmes across complex, regulated organisations. Most recently, he worked at Just Group, where he partnered closely with the CEO and executive leadership team to help shape enterprise architecture and data strategy.

Throughout his career, he has led major technology modernisation initiatives, strengthened data governance frameworks and developed scalable data capabilities that help organisations make better use of information and support

sustainable growth.

“I’m excited to be joining Aztec at such an important stage in its evolution,” said Sangjune Park. “The business has a clear vision, strong culture and a genuine ambition to redefine the future of premium fund administration, and data has a fundamental role to play in achieving that. I look forward to working with colleagues across the business to strengthen our data capabilities, support innovation and help deliver the next generation of technology-enabled client service.”

Sangjune joined the business on 1 July and is based in Aztec’s London office.
